CURRENT POSITION

Institut Mines-Télécom, Business School

Évry

Post-doctoral researcher with the MEDEI project

EDUCATION

Institut Mines-Télécom, Business School

Évry

Ph.D. in Economics

2020 – 26/06/2025

- **Thesis:** Three Essays in Digital Economics: Cloud Technologies and Data Flows
- Advisor: Prof. Grazia Cecere (Institut Mines-Télécom, Business School)

Université Paris-Saclay, Université Paris Dauphine

Paris

M.S. in Network Industries and Digital Economy (IREN)

2020

- **Master thesis:** Behind the Rankings: Gendered Bias in the Children's App Market

Université Paris-Saclay

Paris

Master 1 Innovation, Enterprise and Society (IES)

2019

PROFESSIONAL EXPERIENCES

Sciences Po

Paris

Lecturer

2025 – Present

- Master in Public Policy: Platforms, data, and artificial intelligence – 10 hours in English
- Project mentor for the Impact Studio – 36 hours in English

Paris Dauphine University

Paris

Invited lecturer

2026

- Master in Network Industries and Digital Economy (IREN): Economics of data, with applications to digital marketing, consumer data – 6 hours in French

Institut Mines-Télécom Business School

Évry

Lecturer and teaching assistant

2019 – Present

- Executive Education: Data protection management – in English
- Master's level: Sustainable operations and purchases, Introduction to AI (with Python), Introduction to coding (with Python), Data analysis and econometrics (with R) – in English
- Bachelor's level: Quality and supply chain management – in English, Managerial economics, Microeconomics – in French
- Participated in multiple admission juries for different levels of entry in the school
- Jury member for Master's thesis defense for the Data Protection Management Master's degree, in Executive Education.
- Supervising interns

- Mentored a team of engineering students in the development of an image analysis program for research applications.

Télécom SudParis*Lecturer and teaching assistant*

Evry

2023 – 2025

- PGE (Programme Grande Ecole): Business management – in French

ESSEC Business School*Lecturer*

Cergy

2023 – 2024

- BBA (Bachelor of Business Administration): Macroeconomics – 25 hours in English
- Bachelor in Economics & Management: Macroeconomics – 20 hours in French

JOB MARKET PAPER

Is Digital Sovereignty Achievable? Evidence From Server Locations and Data Flows

Abstract: This study investigates the achievability of digital sovereignty within the European Union by examining website data flows, mainly focusing on non-personal data. Amid growing concerns over data governance and the resurgence of digital sovereignty as a central theme in EU policies, this research uniquely addresses firms' data storage decisions and their implications for EU users. Utilizing an original dataset of the most visited websites in France, this paper analyzes data location preferences across various sectors, revealing a complex interplay between privacy regulations, firm size, sector-specific tendencies, and the underlying internet infrastructure. The findings suggest that firms prioritize data storage in countries with strong privacy regulations and tend to locate data closer to consumers to minimize latency. However, variations are observed based on sector-specific needs and firm size, with larger and tech-oriented firms showing less sensitivity to distance. The study also highlights the significant role of the Internet's backbone infrastructure in shaping data storage strategies, pointing to potential challenges in aligning with digital sovereignty goals.

WORKING PAPER

Navigating the Cloud – A Mechanism-Based Framework for Cloud Adoption

WORK IN PROGRESS

Spatial Dynamics in Cloud Infrastructure: Competition Among Data Center Providers

- *with Katharina Erhardt (Heinrich Heine University Düsseldorf), Andrea Lassmann (University of Mainz), Antonio Russo (Institut Mines-Télécom, Business School) and Mina Taniguchi (University of Mainz)*

Data Centers, Electricity Prices and Sectoral Development in the US Market

- *with Gabriel Loumeau (University of Neuchâtel), Antonio Russo (Institut Mines-Télécom, Business School) and Maximilian Schäfer (Institut Mines-Télécom, Business School)*

PRIZES AND AWARDS

Winner of the “Best Digital Economy Paper Award for Young Researcher” at the CRESSE 2026 Conference in Kos, Greece (awarded by CRESSE in collaboration with the Computer & Communications Industry Association International).

Finalist for “The Best Paper Award by a PhD student” at the WISE 2024 Workshop on Information Systems and Economics organized in Bangkok, Thailand.

CONFERENCES AND SEMINARS

2026

- 13th Postal Economics Conference on “E-commerce, Digital Economics and Delivery Services” – Toulouse, France
- Association Française de Science Économique (AFSE) Annual Congress – Nantes, France
- 20th International Conference on Competition and Regulation (CRESSE) – Kos, Greece

2025

- Munich Summer Institut (MSI) – Munich, Germany
- Digital Transformation Society (DTS) Conference – Paris, France
- FnTC Assises de la confiance numérique – Paris, France

2024

- Workshop on Information Systems and Economics (WISE) – Bangkok, Thailand
- TRUSTINCloudS Seminar CEA – Online
- Digital Transformation Society (DTS) Conference – Naples, Italy
- INDTech Conference on Industrial Technologies – Namur, Belgium

2023

- 11th AFREN Doctoral Workshop – Palaiseau, France
- Young Economist Seminar, Télécom Paris – Palaiseau, France
- 9th Digital Economy Summer School – Avignon, France

2022

- Young Economist Seminar, Télécom Paris – Palaiseau, France
- PhD Seminar IMT-BS – Evry, France
- International Telecommunications Society ITS 31st European Conference – Gothenburg, Sweden
- 8th Digital Economy Summer School – Louvain-la-Neuve, Belgium

2021

- Round table on Gender Equality Mission invited by Polytech Grenoble – Online
- Young Economist Seminar – Télécom Paris – Palaiseau, France
- PhD Seminar IMT-BS – Evry, France

CERTIFICATIONS

Industrial Organization – Applied platform economics
